Art Unit: 1771

1. Claims 27-33 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,458,727. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim an assembly of crosslinked molecularly oriented polymeric polyolefin fibers bound together by a recrystallized polymer melt phase wherein the fibers and recrystallized melt phase are formed from partial melting of a crosslinked molecularly oriented precursor. It is noted that a terminal disclaimer was filed on 7/15/06 to overcome this rejection that was indicated as being proper, however, upon further review before allowance of the application it was noted that the digits 4 and 5 were transposed in the patent number in the original rejection and also in the terminal disclaimer. Therefore, the terminal disclaimer is not proper. Once a corrected terminal disclaimer is filed, the application will be allowed. No fee will be charged since the new terminal disclaimer will be correcting the previous terminal disclaimer which contained the incorrect patent number. The examiner regrets the error.
